Machine Learning in Medicine - a Complete Overview Ton J. Cleophas, Aeilko H. Zwinderman

The current book is the first publication of a complete overview of machine learning methodologies for the medical and health sector. It was written as a training companion and as a must-read, not only for physicians and students, but also for any one involved in the process and progress of health and health care. In eighty chapters eighty different machine learning methodologies are reviewed, in combination with data examples for self-assessment. Each chapter can be studied without the need to consult other chapters.

The amount of data stored in the world's databases doubles every 20 months, and clinicians, familiar with traditional statistical methods, are at a loss to analyze them. Traditional methods have, indeed, difficulty to identify outliers in large datasets, and to find patterns in big data and data with multiple exposure / outcome variables. In addition, analysis-rules for surveys and questionnaires, which are currently common methods of data collection, are, essentially, missing. Fortunately, the new discipline, machine learning, is able to cover all of these limitations.

So far medical professionals have been rather reluctant to use machine learning. Also, in the field of diagnosis making, few doctors may want a computer checking them, are interested in collaboration with a computer or with computer engineers. Adequate health and health care will, however, soon be impossible without proper data supervision from modern machine learning methodologies like cluster models, neural networks and other data mining methodologies.

Each chapter starts with purposes and scientific questions. Then, step-by-step analyses, using data examples, are given. Finally, a paragraph with conclusion, and references to the corresponding sites of three introductory textbooks, previously written by the same authors, is given.

From reader reviews:

Matthew Venegas:

As people who live in the modest era should be up-date about what going on or facts even knowledge to make these keep up with the era that is always change and advance. Some of you maybe will update themselves by examining books. It is a good choice to suit your needs but the problems coming to a person is you don't know what type you should start with. This Machine Learning in Medicine - a Complete Overview is our recommendation to make you keep up with the world. Why, as this book serves what you want and need in this era.

Lisa Walker:

Do you among people who can't read pleasurable if the sentence chained from the straightway, hold on guys this particular aren't like that. This Machine Learning in Medicine - a Complete Overview book is readable by means of you who hate the straight word style. You will find the information here are arrange for enjoyable reading experience without leaving perhaps decrease the knowledge that want to provide to you. The writer regarding Machine Learning in Medicine - a Complete Overview content conveys objective easily to understand by most people. The printed and e-book are not different in the content material but it just different available as it. So , do you still thinking Machine Learning in Medicine - a Complete Overview is not loveable to be your top list reading book?

Fred Peterson:

Don't be worry if you are afraid that this book will certainly filled the space in your house, you may have it in e-book method, more simple and reachable. This kind of Machine Learning in Medicine - a Complete Overview can give you a lot of buddies because by you considering this one book you have point that they don't and make an individual more like an interesting person. This specific book can be one of a step for you to get success. This e-book offer you information that possibly your friend doesn't recognize, by knowing more than some other make you to be great folks. So , why hesitate? Let's have Machine Learning in Medicine - a Complete Overview.

Ann Macdonald:

A lot of guide has printed but it takes a different approach. You can get it by net on social media. You can choose the best book for you, science, comic, novel, or whatever by searching from it. It is named of book Machine Learning in Medicine - a Complete Overview. Contain your knowledge by it. Without making the printed book, it might add your knowledge and make anyone happier to read. It is most significant that, you must aware about guide. It can bring you from one destination to other place.
