**Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap** Teresa K. Attwood, Stephen R. Pettifer, David Thorne

This innovative book provides a completely fresh exploration of bioinformatics, investigating its complex interrelationship with biology and computer science. It approaches bioinformatics from a unique perspective, highlighting interdisciplinary gaps that often trap the unwary.

The book considers how the need for biological databases drove the evolution of bioinformatics; it reviews bioinformatics basics (including database formats, data-types and current analysis methods), and examines key topics in computer science (including data-structures, identifiers and algorithms), reflecting on their use and abuse in bioinformatics.

Bringing these disciplines together, this book is an essential read for those who wish to better understand the challenges for bioinformatics at the interface of biology and computer science, and how to bridge the gaps. It will be an invaluable resource for advanced undergraduate and postgraduate students, and for lecturers, researchers and professionals with an interest in this fascinating, fast-moving discipline and the knotty problems that surround it.

### **From reader reviews:**

#### **Judith Jordan:**

With other case, little individuals like to read book Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap. You can choose the best book if you like reading a book. Providing we know about how is important the book Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap. You can add knowledge and of course you can around the world by the book. Absolutely right, due to the fact from book you can recognize everything! From your country till foreign or abroad you may be known. About simple point until wonderful thing you could know that. In this era, we could open a book as well as searching by internet device. It is called e-book. You can utilize it when you feel fed up to go to the library. Let's examine.

#### **Ida Shroul:**

This Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap are reliable for you who want to be a successful person, why. The main reason of this Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap can be among the great books you must have is giving you more than just simple examining food but feed a person with information that possibly will shock your before knowledge. This book is handy, you can bring it everywhere and whenever your conditions both in e-book and printed ones. Beside that this Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap forcing you to have an enormous of experience for example rich vocabulary, giving you trial of critical thinking that we realize it useful in your day task. So , let's have it appreciate reading.

#### **Andrea Whitt:**

Precisely why? Because this Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap is an unordinary book that the inside of the guide waiting for you to snap it but latter it will jolt you with the secret the idea inside. Reading this book adjacent to it was fantastic author who else write the book in such amazing way makes the content inside easier to understand, entertaining technique but still convey the meaning completely. So , it is good for you for not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of positive aspects than the other book include such as help improving your expertise and your critical thinking means. So , still want to delay having that book? If I had been you I will go to the publication store hurriedly.

#### **Titus Johnson:**

Do you have something that you like such as book? The book lovers usually prefer to select book like comic, short story and the biggest you are novel. Now, why not attempting Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap that give your satisfaction preference will be satisfied by reading this book. Reading habit all over the world can be said as the way for people to know

world considerably better than how they react when it comes to the world. It can't be mentioned constantly that reading behavior only for the geeky particular person but for all of you who wants to always be success person. So , for all you who want to start reading through as your good habit, you can pick Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap become your own starter.
