Prediction Methods for Blood Glucose Concentration: Design, Use and Evaluation (Lecture Notes in Bioengineering)

Prediction Methods for Blood Glucose Concentration: Design, Use and Evaluation (Lecture Notes in Bioengineering)

Prediction Methods for Blood Glucose Concentration: Design, Use and Evaluation (Lecture Notes in Bioengineering)

This book tackles the problem of overshoot and undershoot in blood glucose levels caused by delay in the effects of carbohydrate consumption and insulin administration. The ideas presented here will be very important in maintaining the welfare of insulin-dependent diabetics and avoiding the damaging effects of unpredicted swings in blood glucose – accurate prediction enables the implementation of counter-measures. The glucose prediction algorithms described are also a key and critical ingredient of automated insulin delivery systems, the so-called "artificial pancreas".

The authors address the topic of blood-glucose prediction from medical, scientific and technological points of view. Simulation studies are utilized for complementary analysis but the primary focus of this book is on real applications, using clinical data from diabetic subjects.

The text details the current state of the art by surveying prediction algorithms, and then moves beyond it with the most recent advances in data-based modeling of glucose metabolism. The topic of performance evaluation is discussed and the relationship of clinical and technological needs and goals examined with regard to their implications for medical devices employing prediction algorithms. Practical and theoretical questions associated with such devices and their solutions are highlighted.

This book shows researchers interested in biomedical device technology and control researchers working with predictive algorithms how incorporation of predictive algorithms into the next generation of portable glucose measurement can make treatment of diabetes safer and more efficient.

From reader reviews:

Cornelius Callaghan:

Have you spare time for a day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a go walking, shopping, or went to typically the Mall. How about open or read a book entitled Prediction Methods for Blood Glucose Concentration: Design, Use and Evaluation (Lecture Notes in Bioengineering)? Maybe it is for being best activity for you. You recognize beside you can spend your time with the favorite's book, you can more intelligent than before. Do you agree with their opinion or you have some other opinion?

William Martel:

Reading a e-book can be one of a lot of pastime that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people love it. First reading a reserve will give you a lot of new facts. When you read a book you will get new information mainly because book is one of numerous ways to share the information or their idea. Second, examining a book will make you actually more imaginative. When you looking at a book especially tale fantasy book the author will bring one to imagine the story how the character types do it anything. Third, you may share your knowledge to others. When you read this Prediction Methods for Blood Glucose Concentration: Design, Use and Evaluation (Lecture Notes in Bioengineering), it is possible to tells your family, friends and also soon about yours book. Your knowledge can inspire different ones, make them reading a guide.

Helen Mota:

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their very own friends. Usually they doing activity like watching television, likely to beach, or picnic inside park. They actually doing same every week. Do you feel it? Will you something different to fill your own free time/ holiday? Could be reading a book may be option to fill your free time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the reserve untitled Prediction Methods for Blood Glucose Concentration: Design, Use and Evaluation (Lecture Notes in Bioengineering) can be fine book to read. May be it might be best activity to you.

Joyce Jiminez:

Many people spending their time frame by playing outside together with friends, fun activity together with family or just watching TV 24 hours a day. You can have new activity to enjoy your whole day by reading through a book. Ugh, ya think reading a book really can hard because you have to take the book everywhere? It alright you can have the e-book, getting everywhere you want in your Cell phone. Like Prediction Methods for Blood Glucose Concentration: Design, Use and Evaluation (Lecture Notes in Bioengineering) which is obtaining the e-book version. So , why not try out this book? Let's see.
