Set Theory for Knowledge Representation: Set-Theoretical Languages for Reasoning in Knowledge Domains Cristiano Longo

The decision problem in set theory has been intensively investigated in the last decades, and decision procedures or proofs of undecidability have been provided for several quantified and unquantified fragments of set theory. In this book we study the decision problem for three novel quantified fragments of set theory, which allow the explicit manipulation of ordered pairs. We present a decision procedure for each language of this family, and prove that all of these procedures are optimal (in the sense that they run in nondeterministic polynomial-time) when restricted to formulae with quantifier nesting bounded by a constant. The expressive power of languages of this family is then measured in terms of set-theoretical constructs they allow to express. In addition, these languages can be profitably employed in knowledge representation, since they allow to express a large amount description logic constructs.

From reader reviews:

Walter Jones:

In this 21st millennium, people become competitive in every way. By being competitive at this point, people have to do something to make these people survive, being in the middle of the actual crowded place and notice by surrounding. One thing that often many people have underestimated the idea for a while is reading. Yep, by reading a publication your ability to survive boost then having chance to remain than other is high. For you who want to start reading some sort of book, we give you that Set Theory for Knowledge Representation: Set-Theoretical Languages for Reasoning in Knowledge Domains book as starter and daily reading guide. Why, because this book is usually more than just a book.

Fatima Leonard:

A lot of guide has printed but it is unique. You can get it by online on social media. You can choose the top book for you, science, comic, novel, or whatever by searching from it. It is called of book Set Theory for Knowledge Representation: Set-Theoretical Languages for Reasoning in Knowledge Domains. You'll be able to your knowledge by it. Without leaving behind the printed book, it can add your knowledge and make you happier to read. It is most crucial that, you must aware about publication. It can bring you from one destination for a other place.

Timothy Kahle:

What is your hobby? Have you heard that question when you got college students? We believe that that issue was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And you know that little person such as reading or as reading through become their hobby. You need to understand that reading is very important as well as book as to be the issue. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You discover good news or update concerning something by book. Numerous books that can you take to be your object. One of them is Set Theory for Knowledge Representation: Set-Theoretical Languages for Reasoning in Knowledge Domains.

Veda Howard:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information from the book. Book is created or printed or descriptive from each source which filled update of news. With this modern era like now, many ways to get information are available for you. From media social including newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just in search of the Set Theory for Knowledge Representation: Set-Theoretical Languages for Reasoning in Knowledge Domains when you required it?
