**Software Optimization Cookbook: High-Performance Recipes for the Intel Architecture** Richard Gerber

Revealing the secrets of the software tuning process, *The Software Optimization Cookbook* provides recipes for high-performance applications on the Intel® Pentium® III and Pentium® 4 processors. Simple explanations and C language examples show you how to address performance issues with algorithms, memory access, branching, SIMD instructions, multiple threads, and floating-point calculations. With this book, you need not be a processor architect or assembly language expert to get the full power out of your software on the 32-bit Intel Architecture.

Learn how to:

- Use performance tools and tested concepts to analyze and improve applications.
- Determine which portions of an application should be given highest priority for optimizations.
- Identify the reasons that certain portions of your application are slower than they should be.
- Improve an application by working directly on the root cause of a software bottleneck.
- Design an application from the ground up for maximum performance.

### **From reader reviews:**

#### **Louie Thompson:**

Do you considered one of people who can't read enjoyable if the sentence chained in the straightway, hold on guys this specific aren't like that. This Software Optimization Cookbook: High-Performance Recipes for the Intel Architecture book is readable by simply you who hate those straight word style. You will find the facts here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to provide to you. The writer of Software Optimization Cookbook: High-Performance Recipes for the Intel Architecture content conveys thinking easily to understand by a lot of people. The printed and e-book are not different in the content but it just different available as it. So , do you continue to thinking Software Optimization Cookbook: High-Performance Recipes for the Intel Architecture is not loveable to be your top listing reading book?

#### **David Bergeron:**

Spent a free time for you to be fun activity to try and do! A lot of people spent their sparetime with their family, or their very own friends. Usually they doing activity like watching television, likely to beach, or picnic in the park. They actually doing same every week. Do you feel it? Will you something different to fill your current free time/ holiday? May be reading a book may be option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to try out look for book, may be the publication untitled Software Optimization Cookbook: High-Performance Recipes for the Intel Architecture can be excellent book to read. May be it could be best activity to you.

#### **David Mathews:**

This Software Optimization Cookbook: High-Performance Recipes for the Intel Architecture is great e-book for you because the content and that is full of information for you who all always deal with world and possess to make decision every minute. This kind of book reveal it facts accurately using great manage word or we can declare no rambling sentences in it. So if you are read the idea hurriedly you can have whole details in it. Doesn't mean it only provides straight forward sentences but challenging core information with attractive delivering sentences. Having Software Optimization Cookbook: High-Performance Recipes for the Intel Architecture in your hand like keeping the world in your arm, data in it is not ridiculous just one. We can say that no reserve that offer you world with ten or fifteen tiny right but this guide already do that. So , this is good reading book. Heya Mr. and Mrs. busy do you still doubt that will?

#### **Barbara Kyle:**

As a university student exactly feel bored to be able to reading. If their teacher asked them to go to the library as well as to make summary for some publication, they are complained. Just small students that has reading's heart and soul or real their interest. They just do what the professor want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that reading is not important,

boring as well as can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Software Optimization Cookbook: High-Performance Recipes for the Intel Architecture can make you feel more interested to read.
