Sustainable Shale Oil and Gas: Analytical Chemistry, Geochemistry, and Biochemistry Methods

Vikram Rao, Rob Knight

Shale oil and gas have altered the energy landscape, possibly permanently. They burst upon the fossil energy scene with a suddenness that initially defied prediction. Even the political balance of the world has changed. But, with the methods employed, the vast majority of the oil and gas remains in the ground. At the same time, serious environmental impact issues have been raised. A new volume in the Emerging Issues in Analytical Chemistry series, *Sustainable Shale Oil and Gas Production: Analytical, Biochemical, and Geochemical Methods* was written on the premise that analytical methods to inform these areas were wanting. While not attempting to be comprehensive, it describes important analytical methods, some still in development. These methods are underpinned primarily by chemistry, but geochemistry and even biochemistry play significant roles. The book has a solutions flavor; problems are posed together with approaches to ameliorate them.

- Provides a clear understanding of the potential environmental issues as well as a path to solutions
- Includes background information for understanding potential impacts of shale operations from both an environmental and public health perspective
- Authored by leaders from diverse disciplines with expertise in a variety of areas: groundwater quality, petroleum-related operations, microbial ecology, and electronic technologies
- Reviews new sensing and evaluation methods that could be key enablers to sustainable fracking: portable mass spectrometry, microbiome analysis, DNA as tracers, and a microparticulate matter detector

From reader reviews:

Judith Joiner:

Nowadays reading books be than want or need but also work as a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge your information inside the book that will improve your knowledge and information. The information you get based on what kind of publication you read, if you want drive more knowledge just go with education and learning books but if you want truly feel happy read one together with theme for entertaining for example comic or novel. Typically the Sustainable Shale Oil and Gas: Analytical Chemistry, Geochemistry, and Biochemistry Methods is kind of publication which is giving the reader unforeseen experience.

Ruth Barr:

Reading a book to be new life style in this season; every people loves to go through a book. When you go through a book you can get a great deal of benefit. When you read books, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your review, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, in addition to soon. The Sustainable Shale Oil and Gas: Analytical Chemistry, Geochemistry, and Biochemistry Methods provide you with new experience in looking at a book.

James Hopwood:

Do you like reading a e-book? Confuse to looking for your preferred book? Or your book has been rare? Why so many issue for the book? But any people feel that they enjoy intended for reading. Some people likes reading, not only science book and also novel and Sustainable Shale Oil and Gas: Analytical Chemistry, Geochemistry, and Biochemistry Methods or even others sources were given information for you. After you know how the fantastic a book, you feel desire to read more and more. Science e-book was created for teacher or maybe students especially. Those ebooks are helping them to increase their knowledge. In additional case, beside science e-book, any other book likes Sustainable Shale Oil and Gas: Analytical Chemistry, Geochemistry, and Biochemistry Methods to make your spare time much more colorful. Many types of book like here.

Ryan Harrison:

What is your hobby? Have you heard this question when you got students? We believe that that issue was given by teacher with their students. Many kinds of hobby, Every person has different hobby. And you also know that little person including reading or as looking at become their hobby. You need to know that reading is very important as well as book as to be the point. Book is important thing to provide you knowledge, except your current teacher or lecturer. You will find good news or update about something by book. Many kinds of books that can you decide to try be your object. One of them is niagra Sustainable Shale Oil and

Gas: Analytical Chemistry, Geochemistry, and Biochemistry Methods.
