Face Image Analysis by Unsupervised Learning (The Springer International Series in Engineering and Computer Science)

Marian Stewart Bartlett

Face Image Analysis by Unsupervised Learning (The Springer International Series in Engineering and Computer Science) Marian Stewart Bartlett

Face Image Analysis by Unsupervised Learning explores adaptive approaches to image analysis. It draws upon principles of unsupervised learning and information theory to adapt processing to the immediate task environment. In contrast to more traditional approaches to image analysis in which relevant structure is determined in advance and extracted using hand-engineered techniques, *Face Image Analysis by Unsupervised Learning* explores methods that have roots in biological vision and/or learn about the image structure directly from the image ensemble. Particular attention is paid to unsupervised learning techniques for encoding the statistical dependencies in the image ensemble.

The first part of this volume reviews unsupervised learning, information theory, independent component analysis, and their relation to biological vision. Next, a face image representation using independent component analysis (ICA) is developed, which is an unsupervised learning technique based on optimal information transfer between neurons. The ICA representation is compared to a number of other face representations including eigenfaces and Gabor wavelets on tasks of identity recognition and expression analysis. Finally, methods for learning features that are robust to changes in viewpoint and lighting are presented. These studies provide evidence that encoding input dependencies through unsupervised learning is an effective strategy for face recognition.

Face Image Analysis by Unsupervised Learning is suitable as a secondary text for a graduate-level course, and as a reference for researchers and practitioners in industry.

From reader reviews:

Patricia Rhee:

Why don't make it to be your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite reserve and reading a book. Beside you can solve your trouble; you can add your knowledge by the guide entitled Face Image Analysis by Unsupervised Learning (The Springer International Series in Engineering and Computer Science). Try to make book Face Image Analysis by Unsupervised Learning (The Springer International Series in Engineering and Computer Science) as your friend. It means that it can being your friend when you experience alone and beside that course make you smarter than before. Yeah, it is very fortuned in your case. The book makes you a lot more confidence because you can know almost everything by the book. So , let me make new experience and also knowledge with this book.

Lori Parker:

This book untitled Face Image Analysis by Unsupervised Learning (The Springer International Series in Engineering and Computer Science) to be one of several books this best seller in this year, here is because when you read this e-book you can get a lot of benefit upon it. You will easily to buy this particular book in the book retailer or you can order it by using online. The publisher of this book sells the e-book too. It makes you quickly to read this book, as you can read this book in your Smart phone. So there is no reason for your requirements to past this reserve from your list.

James Ronquillo:

The reserve untitled Face Image Analysis by Unsupervised Learning (The Springer International Series in Engineering and Computer Science) is the book that recommended to you to read. You can see the quality of the guide content that will be shown to you actually. The language that article author use to explained their ideas are easily to understand. The article writer was did a lot of research when write the book, and so the information that they share to your account is absolutely accurate. You also could get the e-book of Face Image Analysis by Unsupervised Learning (The Springer International Series in Engineering and Computer Science) from the publisher to make you a lot more enjoy free time.

Timothy Roesch:

Don't be worry for anyone who is afraid that this book may filled the space in your house, you could have it in e-book approach, more simple and reachable. This kind of Face Image Analysis by Unsupervised Learning (The Springer International Series in Engineering and Computer Science) can give you a lot of close friends because by you taking a look at this one book you have point that they don't and make an individual more like an interesting person. This book can be one of one step for you to get success. This book offer you information that maybe your friend doesn't learn, by knowing more than additional make you to be great persons. So , why hesitate? We should have Face Image Analysis by Unsupervised Learning (The Springer International Series in Engineering and Computer Science).
