Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10) Barry Simon

Barry Simon, I.B.M. Professor of Mathematics and Theoretical Physics at the California Institute of Technology, is the author of several books, including such classics as *Methods of Mathematical Physics* (with M. Reed) and *Functional Integration and Quantum Physics*. This new book, based on courses given at Princeton, Caltech, ETH-Zurich, and other universities, is an introductory textbook on representation theory. According to the author, "Two facets distinguish my approach. First, this book is relatively elementary, and second, while the bulk of the books on the subject is written from the point of view of an algebraist or a geometer, this book is written with an analytical flavor". The exposition in the book centers around the study of representation of certain concrete classes of groups, including permutation groups and compact semisimple Lie groups. It culminates in the complete proof of the Weyl character formula for representations of compact Lie groups and the Frobenius formula for characters of permutation groups. Extremely well tailored both for a one-year course in representation theory and for independent study, this book is an excellent introduction to the subject which, according to the author, is unique in having "so much innate beauty so close to the surface".

From reader reviews:

Cindy Moats:

Why don't make it to be your habit? Right now, try to ready your time to do the important act, like looking for your favorite publication and reading a publication. Beside you can solve your short lived problem; you can add your knowledge by the reserve entitled Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10). Try to the actual book Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10) as your good friend. It means that it can for being your friend when you sense alone and beside that course make you smarter than before. Yeah, it is very fortunated in your case. The book makes you much more confidence because you can know every thing by the book. So , let us make new experience as well as knowledge with this book.

Paulette Rodriguez:

In this 21st centuries, people become competitive in each way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of often the crowded place and notice by means of surrounding. One thing that oftentimes many people have underestimated the item for a while is reading. That's why, by reading a book your ability to survive enhance then having chance to remain than other is high. In your case who want to start reading a book, we give you this particular Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10) book as basic and daily reading guide. Why, because this book is greater than just a book.

Cindy Knutson:

The actual book Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10) has a lot info on it. So when you read this book you can get a lot of benefit. The book was authored by the very famous author. The writer makes some research prior to write this book. This specific book very easy to read you can get the point easily after reading this book.

Jerry Ingle:

Don't be worry should you be afraid that this book will probably filled the space in your house, you could have it in e-book means, more simple and reachable. This Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10) can give you a lot of friends because by you looking at this one book you have thing that they don't and make you more like an interesting person. That book can be one of one step for you to get success. This e-book offer you information that might be your friend doesn't learn, by knowing more than additional make you to be great folks. So , why hesitate? Let me have Representations of Finite and Compact Groups (Graduate Studies in Mathematics ; V. 10).
