Bio-Inspired Computation and Applications in Image Processing

Xin-She Yang, João Paulo Papa

Bio-Inspired Computation and Applications in Image Processing Xin-She Yang, João Paulo Papa

Bio-Inspired Computation and Applications in Image Processing summarizes the latest developments in bio-inspired computation in image processing, focusing on nature-inspired algorithms that are linked with deep learning, such as ant colony optimization, particle swarm optimization, and bat and firefly algorithms that have recently emerged in the field.

In addition to documenting state-of-the-art developments, this book also discusses future research trends in bio-inspired computation, helping researchers establish new research avenues to pursue.

- Reviews the latest developments in bio-inspired computation in image processing
- Focuses on the introduction and analysis of the key bio-inspired methods and techniques
- Combines theory with real-world applications in image processing
- Helps solve complex problems in image and signal processing
- Contains a diverse range of self-contained case studies in real-world applications

From reader reviews:

William Fuller:

What do you ponder on book? It is just for students as they are still students or that for all people in the world, what best subject for that? Just simply you can be answered for that query above. Every person has diverse personality and hobby per other. Don't to be pressured someone or something that they don't want do that. You must know how great in addition to important the book Bio-Inspired Computation and Applications in Image Processing. All type of book can you see on many methods. You can look for the internet resources or other social media.

Edward Brown:

Book is to be different for every grade. Book for children until finally adult are different content. As it is known to us that book is very important for all of us. The book Bio-Inspired Computation and Applications in Image Processing has been making you to know about other information and of course you can take more information. It is rather advantages for you. The publication Bio-Inspired Computation and Applications in Image Processing is not only giving you much more new information but also to get your friend when you really feel bored. You can spend your own personal spend time to read your publication. Try to make relationship with all the book Bio-Inspired Computation and Applications in Image Processing. You never feel lose out for everything in the event you read some books.

Lonnie Hammer:

Hey guys, do you wishes to finds a new book you just read? May be the book with the name Bio-Inspired Computation and Applications in Image Processing suitable to you? The actual book was written by well-known writer in this era. Typically the book untitled Bio-Inspired Computation and Applications in Image Processing is a single of several books that everyone read now. This kind of book was inspired many men and women in the world. When you read this publication you will enter the new age that you ever know previous to. The author explained their thought in the simple way, consequently all of people can easily to comprehend the core of this publication. This book will give you a great deal of information about this world now. In order to see the represented of the world in this book.

Romana Linder:

The particular book Bio-Inspired Computation and Applications in Image Processing has a lot info on it. So when you check out this book you can get a lot of profit. The book was authored by the very famous author. This articles author makes some research just before write this book. This specific book very easy to read you can find the point easily after reading this book.
