Essentials of Modern Hearing Aids: Selection, Fitting, and Verification Todd A. Ricketts, Ruth Bentler, H. Gustav Mueller

Essentials of Modern Hearing Aids: Selection, Fitting, and Verification is a comprehensive textbook for graduate-level amplification courses in audiology programs. This is truly an "A to Z" textbook written with university faculty and their graduate students in mind. Topics include audiological pre-fitting testing, needs assessment and treatment planning, hearing aid selection, verification, orientation and counseling, post-fitting follow-up, and real-world validation.

The world-renowned authors have included numerous pre-fitting and post-fitting tests that can be conducted along with step-by-step protocols for their administration and scoring. They also review the selection of hearing aid styles and fitting arrangements, explain the process of obtaining an ear impression, and making critical decisions regarding earmolds and hearing aid plumbing. *Essentials of Modern Hearing Aids* provides guidance for selecting prescriptive fitting approaches and detailed protocols for the use of behavioral measures and real-ear speech mapping to both verify the fitting and assess special hearing aid features. Follow-up care and auditory training options also are reviewed, along with signal processing and technology.

Key Features:

- Included throughout the text are short paragraphs identified as "Technical Tips," "Key Concepts," "Things to Remember," "Points to Ponder," and "Soapbox" for quick reference.
- Interesting tidbits of information not quite relevant enough to include in the chapters, but yet too good to toss aside, are featured in the back of the text as "Endnotes."
- The text covers both foundation and direct clinical application.
- The veteran authors have over 100 years of combined experience in day-to-day patient care and clinical research.

Written in an accessible and easy-to-read style, this text includes not only reference information, but also tools supported by research and clinical experience. The information is presented in a way that is both accessible to clinical students with little experience in the field and with enough depth for even the serious hearing aid researcher. The text is also appropriate as a handy companion for busy clinicians a friendly resource where they can quickly find critical information needed for the next patient.
