A Mathematical Nature Walk

John A. Adam

A Mathematical Nature Walk John A. Adam

How heavy is that cloud? Why can you see farther in rain than in fog? Why are the droplets on that spider web spaced apart so evenly? If you have ever asked questions like these while outdoors, and wondered how you might figure out the answers, this is a book for you. An entertaining and informative collection of fascinating puzzles from the natural world around us, *A Mathematical Nature Walk* will delight anyone who loves nature or math or both.

John Adam presents ninety-six questions about many common natural phenomena--and a few uncommon ones--and then shows how to answer them using mostly basic mathematics. Can you weigh a pumpkin just by carefully looking at it? Why can you see farther in rain than in fog? What causes the variations in the colors of butterfly wings, bird feathers, and oil slicks? And why are large haystacks prone to spontaneous combustion? These are just a few of the questions you'll find inside. Many of the problems are illustrated with photos and drawings, and the book also has answers, a glossary of terms, and a list of some of the patterns found in nature. About a quarter of the questions can be answered with arithmetic, and many of the rest require only precalculus. But regardless of math background, readers will learn from the informal descriptions of the problems and gain a new appreciation of the beauty of nature and the mathematics that lies behind it.

From reader reviews:

Ricky Copeland:

As people who live in typically the modest era should be upgrade about what going on or facts even knowledge to make these individuals keep up with the era and that is always change and move forward. Some of you maybe will certainly update themselves by examining books. It is a good choice for you but the problems coming to you is you don't know what kind you should start with. This A Mathematical Nature Walk is our recommendation to help you keep up with the world. Why, because book serves what you want and want in this era.

Howard Kincaid:

Reading a reserve can be one of a lot of pastime that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new details. When you read a guide you will get new information because book is one of numerous ways to share the information or their idea. Second, studying a book will make you actually more imaginative. When you looking at a book especially fiction book the author will bring someone to imagine the story how the people do it anything. Third, you are able to share your knowledge to other individuals. When you read this A Mathematical Nature Walk, you are able to tells your family, friends and also soon about yours publication. Your knowledge can inspire the others, make them reading a publication.

Christina McMullen:

This A Mathematical Nature Walk is great publication for you because the content which is full of information for you who all always deal with world and have to make decision every minute. This book reveal it facts accurately using great coordinate word or we can state no rambling sentences included. So if you are read this hurriedly you can have whole data in it. Doesn't mean it only offers you straight forward sentences but hard core information with beautiful delivering sentences. Having A Mathematical Nature Walk in your hand like having the world in your arm, info in it is not ridiculous just one. We can say that no publication that offer you world inside ten or fifteen small right but this reserve already do that. So , this can be good reading book. Hello Mr. and Mrs. occupied do you still doubt that will?

Blanche Jackson:

A lot of e-book has printed but it takes a different approach. You can get it by world wide web on social media. You can choose the very best book for you, science, comedian, novel, or whatever simply by searching from it. It is called of book A Mathematical Nature Walk. Contain your knowledge by it. Without leaving behind the printed book, it can add your knowledge and make a person happier to read. It is most critical that, you must aware about book. It can bring you from one location to other place.
